# Project Background

Digital Local Government: Working for Everyone is Ireland's Local Government Digital and ICT Strategy 2030. The strategy was adopted in September 2023. The strategy has been designed as a business strategy for the sector, with the aim of using technology to support the delivery of the sector's business objectives. The strategy is comprised of several sections –

Foreword sets out the role of local government and achievements to date with ICT in the sector; outlines the potential for the strategy to support various priorities in the sector; identifies the potential for the use of new and emerging technology; describes the need to support our staff with tools and training; sets out our ambition for the strategy.

Part 1: Context outlines existing European and national strategies which provide a context for this strategy.

Part 2: Vision sets out a vision for modern local government services powered by digital technology.

Part 3: Themes and Enablers sets out the four core strategy themes of –

Digital Services; Digital Communities; Digital Workforce; Digital Systems  
Seven key enablers are also set out which will support the four key themes.

Part 4: Statements of Intent is the main body of the strategy; it consists of 38 statements of intent grouped under each of the four core themes; these statements of intent set out our aspirations and what we intend to achieve over

the lifetime of the strategy; a case study is also included for each of the core themes to provide examples of best practice in the sector to date.

Part 5: Delivery Approach outlines how we intend to turn this strategy and the statements of intent into reality, including an implementation plan, flexibility/adaptability, measurement and phasing; an indicative timeline for the first phase of the implementation plan is included.

Part 6: Road Ahead – describes what the future will look like and what we will achieve through the implementation of this strategy.

The following are the benefits envisaged by 2030 as a result of implementing the strategy –

- 90% of applicable local government services will be online.
- our communities will have the connectivity, facilities and support that they need to take part in digital society.
- our staff will have the tools and skills to enable modern, digital working; and
- We will have secure, modern, linked systems that will make sure our service provision is efficient and effective.

A draft action plan has been developed in parallel with the development of the strategy. The plan includes 73 actions grouped into Now (1-2 years), Next (3-4 years) and Later (5-6 years) actions. The action plan will be reviewed annually. Progress will be assessed with quantitative measures such as usage of online services which will be published annually. Qualitative measures will also be gathered through feedback from members of the public, businesses, and staff. These quantitative and qualitative measures will be analysed, and that analysis will be an input to the annual review. Following the review process the action plan will be amended as required.

A funding proposal has been approved by the LGMA Board for strategy actions to be delivered in 2024. The funding proposal includes provision for the recruitment of a small team to manage the implementation of the strategy.

A Programme Board has been established to provide appropriate governance arrangements in relation to the implementation of the Local Government Digital and ICT Strategy and to oversee and guide the successful implementation of the action plan.

## About the Role

The Change Manager Project Lead – Grade 7 (Temporary) will work as part of the Digital and ICT Strategy team which manages the implementation of Digital Local Government: Working for Everyone – Ireland’s Local Government Digital and ICT Strategy 2030. The Digital and ICT Strategy team is part of the Digital, ICT and Cybersecurity pillar of the LGMA. The team is responsible for managing the programme of work to deliver the actions in the action plan, manage the strategy implementation team, manage the tender process for consultancy support services to implement the strategy action plan, and work with successful tenderers and stakeholders to deliver the actions in the strategy action plan.

The Project Lead will promote the Digital and ICT Strategy through specific actions that are included in the Digital and ICT Strategy Action Plan. The Project Lead will work as a member of the Digital and ICT Strategy team and will report directly to the Project Manager Grade 8 – Local Government Digital and ICT Strategy. The Project Lead will work closely with colleagues in the Digital and ICT Strategy team in relation to the performance of their duties. They will also work with local authorities, external service providers, external agencies, and other stakeholders to deliver the actions set out in the Digital and ICT Strategy Action Plan. The Project Lead will have an important communication and collaboration role both internally within the Digital and ICT Strategy Team and within the LGMA, and also with local authorities and wider sectoral interests.
